ABOUT US

At Qu-Med Disposable, we're committed to providing high-quality medical devices to healthcare providers and patients. Our team has years of experience in the medical device industry, and we're dedicated to utilize that experience to create products that meet the needs of our customers.

We manufacture a wide range of products in medical devices category like Infusion, Urology, Anesthesia, Surgery Suction Set and Critical care. All of our products are designed to meet the highest standards of quality and safety, and we're proud of the reputation we've built for ourselves over the years.

We believe that our commitment to quality and customer service sets us apart from other medical device manufacturers. We're always looking for ways to improve our products and services, and we're dedicated to building strong relationships with our customers.

Whether you're a healthcare provider or a patient, we're here to help you get the medical devices you need to stay healthy and safe.

OUR FOUNDERS

KP SINGHANIA & **VIJAY KUMAR SONI** started the business in just a small space with handful of products and now it has emerged in this industry with huge range of products that we manufacture in-house with a vision to create high-quality medical devices that could improve the lives of patients around the world. With years of experience in the medical items manufacturing industry, they were able to build a company that has become known for its commitment to quality and customer service. Today, Qu-Med Disposable is a trusted name in the medical device industry, and its products are used by healthcare providers and patients around the world.

OUR COMMITMENT TOWARDS SOCIETY

At Qu-Med Disposable, we believe that our commitment to social responsibility is just as important as our commitment to quality and innovation. That's why we make it a priority to give back to the community and support those in need whenever we can. During the COVID-19 pandemic, we distributed essential medical items to those who needed them for free, demonstrating our dedication to helping others and contributing to the greater good.

Our commitment to social responsibility is a core value of Qu-Med Disposable, and it's reflected in everything we do. We believe that by putting people first and focusing on the needs of the community, we can make a positive impact in the world and help improve the lives of patients around the globe. We're proud to be a trusted and reliable partner for healthcare providers and patients alike, and we look forward to continuing to make a difference in the years to come."

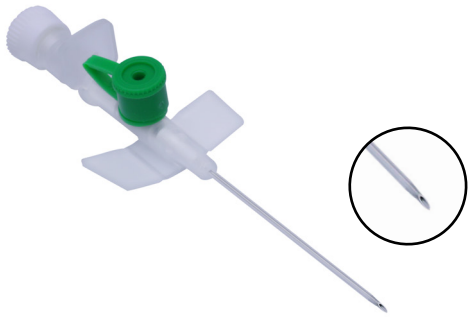

INFUSION

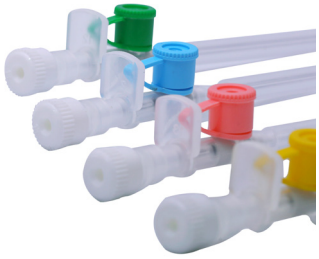

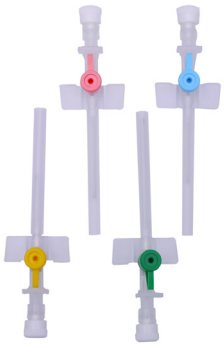

QU-FLON

I.V. CANNULA

IV cannula, also known as an intravenous catheter, is a medical device that is used to deliver fluids, medications, or blood products directly into a patient's bloodstream. The cannula is a small, flexible tube that is inserted into a vein, typically in the arm or hand.

Features :

- Comes with injection port with colour coded cap.
- Non-toxic.
- Sharp flexible teflon that can be easily inserted into a vein.
- Secured in place with a dressing or adhesive tape
- Sterile & single use.

Specifications :

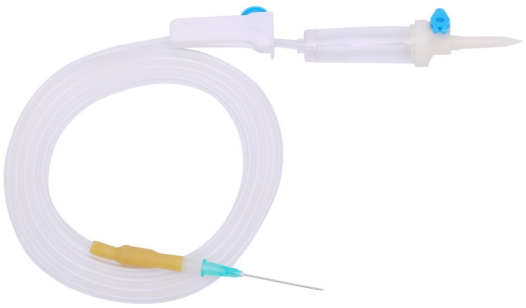

Reference No.	Gauge	Color	Effective Length
Q0130	14	ORANGE	45
Q0131	16	GREY	45
Q0132	17	WHITE	45
Q0041	18	GREEN	45

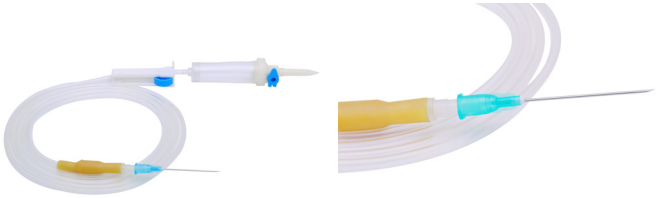

Reference No.	Gauge	Color	Effective Length
Q0042	20	PINK	32
Q0043	22	BLUE	22
Q0044	24	YELLOW	19
Q0133	26	VOILET	19

QU-DRIP

I.V. SET

An IV set, also known as an intravenous infusion set, is a medical device that is used to deliver fluids, medications, or blood products directly into a patient's bloodstream through an IV line. The set includes a plastic bag or bottle that holds the fluid, a tubing that connects the bag or bottle to the patient's IV line, and a drip chamber that regulates the flow of the fluid.

Features :

- Sharp spike for easy piercing with antibacterial snap cap.
- Smooth roller clamp for regulating flow rate.
- Kink resistant PVC tubing.
- Latex free bulb at distal end for intermittent medication.
- Sterile, single use and non toxic.

Specifications :

Reference No.	Type
Q0045	IV Set (ECONOMIC)
Q0046	IV Set with air-vent(ECONOMIC)
Q0047	IV Set (STD)
Q0049	IV Set (PREMIUM)

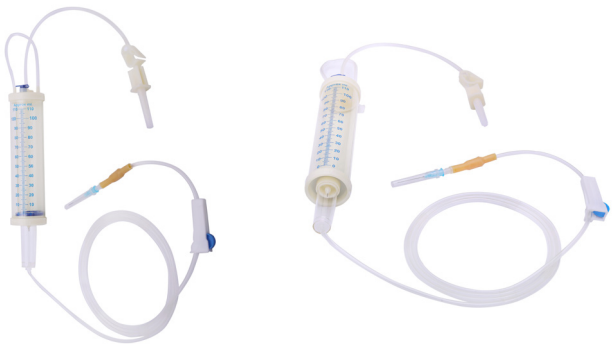

Reference No.	Type
Q0050	IV Set with air-vent(PREMIUM)
Q0051	IV Set with Y-site
QO52	IV Set with air-vent & Y-site

QU-VOLS

M.V. SET

Measured volume set is an inline calibrated enclosure which is attached with primary I.V. infusion set through spike adaptor at the distal end of the in-line measured volume set. Clamps on each set are closed while the spike of the in-line measured volume cylinder is inserted into a fluid container.

Features :

•Transparent drip chamber.
• Kink resistant PVC tubing.
• Automatic shut off valve prevents entry of air once the burette chamber gets emptied.
•Micro Drip with drop size 60 drops per ml.
• Easy to read scale with white contrast background.
• Sterile and single use.

Specifications :

Reference No.	Type	Capacity (in ml)
Q0057	110 ML With luer lock & luer slip	110
Q0058	150 ML With luer lock & luer slip	150
Q0059	110 ML With air-vented spike	110
Q0060	150 ML With air-vented spike	150

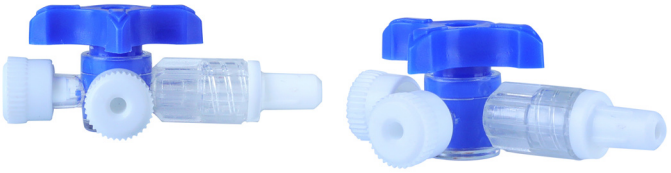

Reference No.	Type	Capacity (in ml)
Q0061	110ML With Y-site	110
Q0062	150ML With Y-site	150
Q0063	MV Set with non air-vented spike	

QU-3 WAY

THREE WAY STOP COCK

A 3-way stopcock is a device that has three ports that can be used to administer medication, take blood samples, or infuse fluids. It allows the healthcare provider to switch between ports to control the flow of fluids.

Features :

• Transparent channel made of bio compatible polycarbonate for easy visualization of fluids.
• Universal 6% taper to make it compatible with wide range of other medical equipment.
• It has three ports that can be used to administer medication, take blood samples, or infuse fluids.
• It allows the healthcare provider to switch between ports to control the flow of fluids.
• Sterile, single use and non-toxic.

Specifications :

STANDARD

Reference No.	Type
Q0064	3 way stopcock (STD)
Q0065	3 way stopcock (STD)- LIPID

45°

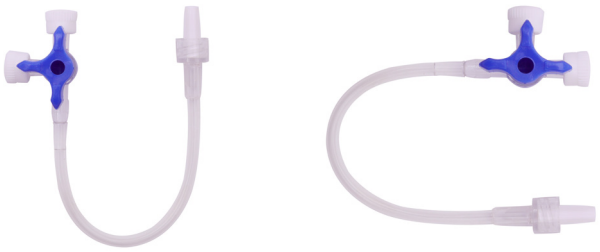

Reference No.	Type
Q0066	3 way stopcock (STD)- 45°
Q0067	3 way stopcock (STD)- 45° LIPID

QU-3 WAY EXT

THREE WAY STOP COCK WITH EXTENSION LINE

Three way stop extension line is used with infusion device to provide a extra channel made up of PVC tube for the infusioin of medicine to patient.

Features :

- Transparent channel made of bio compatible polycarbonate for easy visualization of fluids comes with PVC extending tube.
- Universal 6% taper to make it compatible with wide range of other medical Equipment.
- It allows for the attachment of additional tubing.
- Sterile, single use and non-pyrogenic.

Specifications :

STANDARD

Reference No.	Tube Length (in cm)
Q0068	50
Q0069	100
Q0070	150
Q0071	200
Q0072	250

Q0077	250

QU-VEINS

EXTENSION SET

Extension set is a medical device that is used to increase the length of an infusion set. It is attached to the standard length infusion set to increase its length.

Features :

- Transparent (with color coded sticker).
- 6% taper male & female Luer locks.
- Kink resistant PVC tubing.
- Low Pressure tube dia. Int. (3.0mm) Ext. (4.1mm) & pressure handling capacity: 60 psi.
- Sterile, single use and non-pyrogenic.

Specifications :

QU-VEINS (LOW-PRESSURE)

Reference No.	Tube Length (in cm)
Q0118	10
Q0119	25
Q0120	50
Q0121	100
Q0122	150
Q0123	200

Q0128	250

QU-FLOW

FLOW REGULATOR

FOR I.V. SET & EXTENSION SET

The IV flow regulator is used to regulate the flow of I.V. fluid from the infusion set to the intravenous cannula and having a smooth kink resistance tube, ensures a constant flow rate.

Features :

- Maintains constant flow rate.
- Prevents fluid backflow.
- Smooth roller clamp for regulating flow rate.
- Kink resistant PVC tubing.
- Latex free bulb at distal end for intermittent medication.
- Sterile, single use and non pyrogenic.

Specifications :

QU-FLOW

Reference No.	Type
Q0053	IV Set with flow regulator
Q0054	IV Set with flow regulator, & air-vent

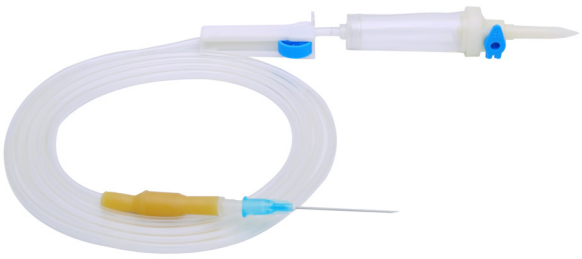

QU-FLOW VEINS

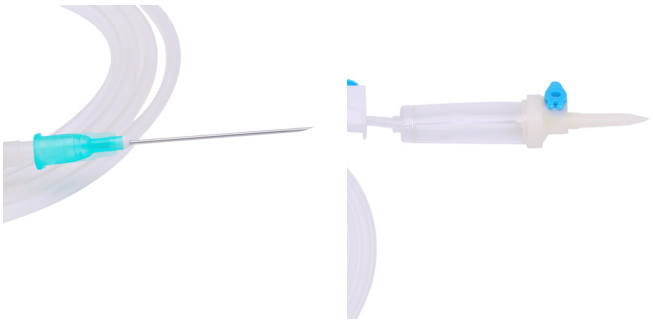

Reference No.	Type
Q0129	Extension tube with IV flow regulator

QU-MICRODRIP

MICRODRIP IV SET

A microdrip infusion set is a medical device that is used to deliver fluids, such as medications, to a patient's body through an intravenous (IV) line. The set includes a small plastic chamber that holds the medication or fluid, a drip chamber that regulates the flow of the fluid, and a tubing that connects the chamber to the patient's IV line.

Features :

- Sharp spike for easy piercing with antibacterial snap cap.
- Smooth roller clamp for regulating flow rate.
- Kink resistant PVC tubing.
- Latex free bulb at distal end for intermittent medication.
- Sterile, single use and non pyrogenic.

Specifications :

QU-DRIP

Reference No.	Type
Q0055	Microdrip set infusion set

QU-FLOW ALPHA

Reference No.	Type
Q0056	Microdrip set with air-vent

UROLOGY

QU-URO

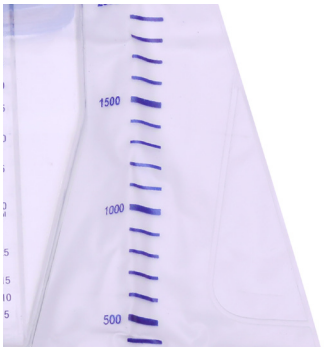

URINE COLLECTION BAG

A urine bag is a medical device that is used to collect urine from a patient. The bag is made of a transparent material so that the contents can be easily monitored. This device is often used in hospitals or other medical settings where it is necessary to monitor a patient's urine output.

Features :

- Manufactured from soft clinical grade PVC sheet with radio opaque and markings.
- Push pull type bottom outlet allows convenient emptying.
- Efficient non-return valve prevents the backflow.
- Sterile & single use.

Specifications :

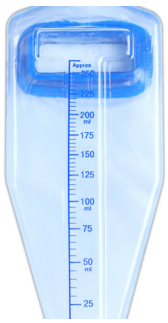

Reference No.	Type
Q0019	Urine collecting bag

URINE COLLECTION BAG
WITH MEASURED CHAMBER

A urine bag with measured chamber is a medical device that is used to collect urine from a patient. The bag is made of a transparent material so that the contents can be easily monitored. The measured chamber is used to measure the volume of urine that is collected. This device is often used in hospitals or other medical settings where it is necessary to monitor a patient's urine output. The bag is designed to be used for a single patient and is disposed of after use to prevent the spread of infection.

Features :

- Super smooth kink resistance tube provided with universal tapered connector.
- Designed for accurate measurement of hourly urine output during examination of the patient.
- Urine Bag is manufactured from extra strong sheeting to withstand during the long period.
- Specially designed hook facilities for carrying, handling and holding the tube in upright position.
- Urine bag attached directly with measured volume meter ensures auto over flow and convenience to empty the measured volume meter in the bag.

Bag Size	Chamber Size
2000ml	250ml

Specifications :

Reference No.	Type
Q0018	Urine collecing bag with Measured chamber

ANESTHESIA

QU-CISER

RESPIRATORY EXERCISER / SPIROMETER

A spirometer is a device used to measure the volume of air inhaled and exhaled by the lungs. It measures ventilation, which is the movement of air in and out of the lungs. Spirometers are commonly used to identify the cause of shortness of breath, assess the impact of contaminants on lung function, evaluate the effects of medication, and monitor the progress of disease treatment.

Two types of spirometers Available:

1. Three ball spirometer (Three ball)
2. Incentive spirometer (single ball)

Three ball spirometer (Three ball)

Features :

• Three chamber design allows patient to lift the balls without any resistant to achieve the maximum volume in minimum time.
• Transparent, well calibrated chambers with color coded triple balls allows visual calibration and estimation of the patient's progress.
• Air filter for enhanced protection.
• Medical grade flawless sealing.
• Sleek and stable design.

Incentive spirometer (Single ball)

Features :

• Encourages deep and prolonged inspiration.
• Helps to develop, improve and maintain respiratory fitness.
• Transparent calibrated chamber with colored ball allows visual calibration and estimation of the patient's progress.
• Soft, aesthetically colored inspiratory tubing with accommodative groove when not in use.
• The system works on maximum inspiration maintained.
• Air filter for enhanced protection.
• Medical grade flawless sealing.
• The small size design proves economical in maintenance and storage cost.

Specifications :

Reference No.	Type
Q0028	3-Ball spirometer (Three ball)
Q0029	Incentive spirometer (Single ball)

QU-FUME

NEBULIZER MASK

Nebulizer mask is made up of non-toxic medical grade material, used to administer the medication directly into the lungs in oxygen therapy. It usually provides the misty air medication which is usually taken in case of utmost chest congestion.

Features :

- Manufactured from soft, non-toxic medical grade PVC material.
- Star lumen tube to avoid fortuitous blockage.
- Made up of a kink-resistant PVC tube.
- Integrated nasal clip for stable fixation over the patient's nose.
- Elastic strap/band helps in proper mask placement.
- Sterile & single use.

Specifications :

Reference No.	Type
Q0012	Nebuliser mask (ADULT)
Q0082	Nebuliser mask (ADULT) with Adjustable chamber
Q0013	Nebuliser mask (PAED.)
Q0084	Nebuliser mask (PAED.) with Adjustable chamber

Reference No.	Type
Q0078	Nebuliser mask kit (ADULT & PAED.)
Q0080	Nebuliser mask kit (ADULT & PAED.) with Adjustable chamber

T PIECE & MOUTH PIECE

The Mouth piece and T-piece on a nebulizer mask is use to deliver medication in a mist form directly to the lungs. The Mouth piece is placed in the mouth, while the T-piece connects to the nebulizer machine and the mask.

Features :

- The Mouth piece is designed to fit comfortably in the mouth and is made of medical-grade plastic.
- The T-piece is made of durable plastic and connects the nebulizer machine to the mask.
- The T-piece allows for the flow of medication from the nebulizer machine to the mask and into the lungs.
- Both the Mouth piece and T-piece are easy to clean and disinfect to prevent the spread of infection.

Specifications :

Reference No.	Type
Q0014	Nebuliser mask (ADULT) with M.P & T Pcs
Q0015	Nebuliser mask (PAED.) with M.P & T Pcs
Q0079	Nebuliser mask kit with M.P & T Pcs

Reference No.	Type
Q0081	Nebuliser mask kit with Adjustable chamber with M.P & T Pcs
Q0083	Nebuliser mask (ADULT) with Adjustable chamber with M.P & T Pcs
Q0085	Nebuliser mask (PAED.) with Adjustable chamber with M.P & T Pcs

QU-DEL

GUEDEL AIRWAYS

Are designed to keep the oropharyngeal airway unobstructed during general anesthesia and in unconscious patients.

Features :

- The guedel airway is manufactured from kink resistant and non-toxic polyethylene. Achieve extra soft surface finish.
- Bite block to prevent biting of tongue and airway occlusion.
- Smooth airway path for easy cleaning
- Different color for different sizes.

Specifications :

Reference No.	Size	Color	Length
Q0020	000	Voilet	40
Q0021	00	Blue	50
Q0022	0	White	60
Q0023	1	Black	70

Reference No.	Size	Color	Length
Q0024	2	Green	80
Q0025	3	Orange	90
Q0026	4	Red	100
Q0027	5	Yellow	110

QU-CLEAN

HME FILTER

HME Filters are used in respiratory support equipment such as life support and human ventilation machine, fitted in the airway between equipment and patient. The removal of bacteria from the air breathed in the hospital environment is critical in the protection of the patients.

Features :

- Light weight and transparent.
- Soft feathered edges for increase patient comfort.
- Nose clip for nose bridge adjustment, and for better fitment.
- Unobstructed oxygen flow and no irritation.
- Soft nasal prongs.
- Kink resistant
- Adjustable fittings
- Latex free nature

Specifications :

Reference No.	Type
Q0016	HME Filter (ADULT)

Reference No.	Type
Q0017	HME Filter (PAED.)

QU-VENT

VENTURY MASK

To deliver a blend of air and oxygen in an almost precise proportion to the patient's airway, a flexible, cone-shaped device is placed over their nose and mouth. The device typically comes with a replaceable part that can be modified to adjust the mixture ratio of air and oxygen, ensuring that oxygen is delivered at the desired concentration.

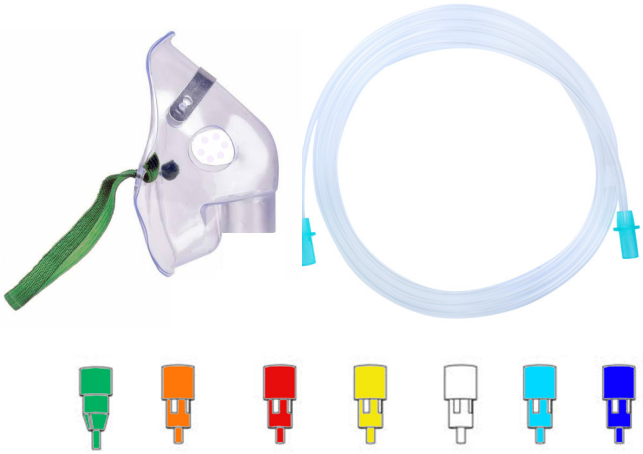

SINGLE DIAL VENTURY MASK

Single Dial Ventury masks are devices that are constructed to supply oxygen or other gases to an individual. In this, there are two oxygen diluters, where one (white colored) is for 24%,26%, 28% and 30%, while another (Green colored) is for 35%, 40%, or 50%. The appropriate percentage of oxygen that is required can be selected by setting the indicator of the diluter.

MULTI FLOW VENTURY MASK

Multiflow Ventury masks are devices that are constructed to supply oxygen or other gases to an individual. This have 7 different connectors having varied color coding from 24% to 60%. Every single connector has diverse marking of the required flow of oxygen in liters per minute with percentage achieved through it.

Features :

- Light weight and transparent.
- Soft feathered edges for increase patient comfort.
- Nose clip for nose bridge adjustment, and for better fitment.
- Color coded, air entrainment low and medium concentration diluters.
- Kink resistant
- Adjustable fittings
- Latex free nature.
- Sterile & single use.

Specifications :

SINGLE DIAL

Reference No.	Type
Q0006	Ventury Mask (ADULT)
Q0007	Ventury Mask (PAED.)

MULTI DIAL

Reference No.	Type
Q0008	Ventury Mask (ADULT)
Q0009	Ventury Mask (PAED.)

QU-CON

HIGH CONCENTRATION MASK

Non-Re breathing Masks and High Concentration Oxygen Masks with a reservoir bag are used to deliver high concentrations of oxygen. A one-way valve allows oxygen to be delivered to the reservoir bag during expiration and minimizes air entrainment during inspiration to achieve a high oxygen concentration.

Features :

- Low-resistance non-stick check valve at neck of reservoir bag.
- Non returning valves provided at inhale and exhale points.
- Soft PVC with rolled edges.
- Securely anchored adjustable nose clip.
- Transparent.
- Crush resistant safety tubing.
- Swivel connector.
- Latex free, non-pyrogenic and non-toxic.

Specifications :

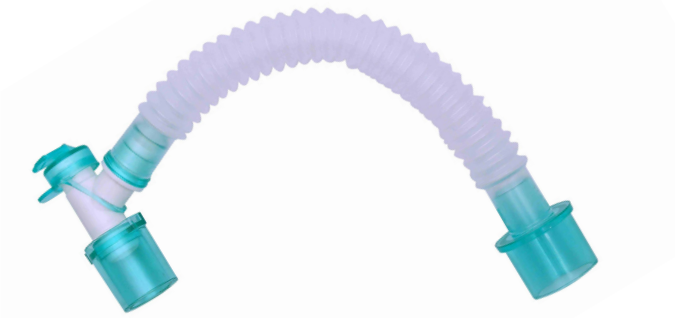

Reference No.	Type
Q0010	High concentration mask (ADULT)

Reference No.	Type
Q0011	High concentration mask (PAED.)

QU-MOUNT

CATHETER MOUNT

Catheter mount is a medical accessory that is attached with the tracheal tube to the end of the anesthetic breathing system. Various attachments fit between the distal end and the tracheal tube. The double swivel ensures that there is no dragging on the breathing circuit and ET or TT.

Features :

- Expandable corrugated tube for adjustment of length as per need.
- All tube and connector are compatible with gases and reagents.
- Sterile & single use.

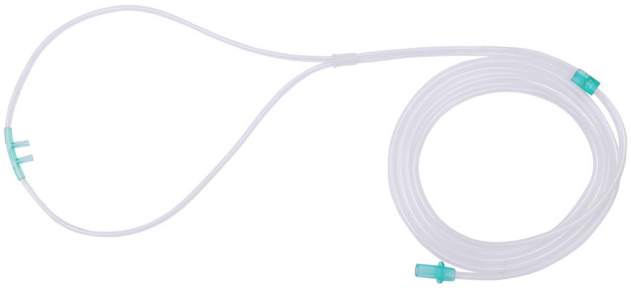

Specifications :

Reference No.	Type
Q0031	Cathater mount standard
Q0032	Cathater mount expandable

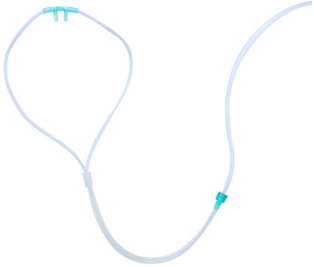

QU-WIN

NASAL CANNULA

Nasal cannula is made up of non-toxic medical grade material, used to deliver small concentration of supplement oxygen with rigid control of respiration in oxygen therapy.

Features :

- Manufactured from soft, non-toxic medical grade material.
- Star lumen tube to avoid fortuitous blockage.
- Made up of kink resistant PVC tube.
- Twin Nasal prong ensures equal distribution of oxygen.

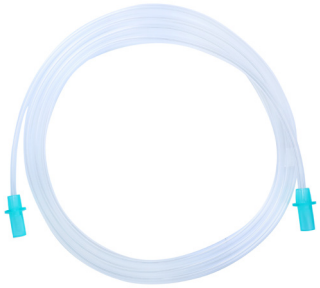

Specifications :

Reference No.	Type
Q0001	Nasal cannula (ADULT)
Q0002	Nasal cannula (PAED.)
Q0003	Nasal cannula (NEONATAL)

QU-MASK

OXYGEN MASK

Oxygen mask is used for high concentration oxygen therapy. It is manufactured from toxic free medical grade PVC tubing. Its efficiency depends on how well the mask fits and the patient's respiratory demands. The oxygen mask can cover the patient's nose and mouth or the entire face.

Features :

- Light weight and transparent.
- Soft feathered edges.
- Nose clip for nose bridge adjustment, and for better fitment.
- Pull through adjustment elastic head band & swivel tubing connector used for changing the angle of operation without disturbing the mask.
- Kink resistant
- Adjustable fittings
- Latex free nature
- Sterile & single use.

Specifications :

Reference No.	Type
Q0004	Oxygen mask (ADULT)

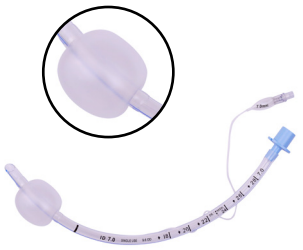

Reference No.	Type
Q0005	Oxygen mask (PAED.)

QU-EAL

ENDOTRACHEAL TUBE

It is a flexible tube that can be placed in the trachea through the mouth or nose It is used to help with breathing during surgery or to support breathing in people with lung disease, chest trauma, or airway obstruction

Features :

- Radio opaque line and markings on the endotracheal tube or ET tube facilitate identification of tube position.
- Endotracheal tube or ET tube has a universal 15 mm connector at the proximal end.
- Sterile and pyrogen-free. It is meant for single patient use only.
- Murphy eye with smooth edges and tip to reduce any trauma to the patient during procedure.
- High volume, low pressure cuff to build an air tight grip between tube and trachea to avoid any leakages.
- Endotracheal tube is made from non-toxic, non-irritant, medical grade clear PVC.

Endotracheal tube comes in two variants:

1. Endotracheal Tube Cuffed
2. Endotracheal Tube Plain

Specifications :

ENDOTRACHEAL TUBE (CUFFED)

SURGERY SUCTION SET

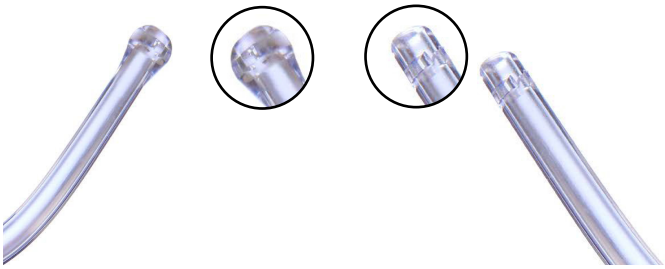

QU-VAC SUC

YANKUR SUCTION SET

The Yankauer suction set is typically made of a transparent plastic material, so that the surgeon can see the fluids and blood being removed. It is designed to be used with a suction machine, which creates the vacuum needed to draw the fluids and blood into the tube. It is a sterile product and is usually disposed of after use to prevent the spread of infection.
The Yankauer suction set is available in two types of tips: the standard tip and the crown tip. The standard tip is a straight, smooth tube that is used for general suctioning, while the vented tip has a series of small holes on the side of the tube that allow air to enter the tube while suction is being applied. The vented tip is typically used for suctioning delicate tissues, such as the throat or mouth, as it reduces the risk of tissue damage or trauma. The suction set is available in two types of handle tips Standard tip & Crown tip.

Features :

• Universal connectors are moulded from soft PVC, so as to accommodate the suction tip on one end and all type of connectors of suction apparatus all the other end.
• Ribbed tube is kink resistant and has the straight to withstand the suction
• Transparent handle with thumb control hole for smooth suction.
• Sterile & single use.

CROWN TIP **STANDARD TIP**

Specifications :

YANKAUR SUCTION HANDLE Available in two versions:
1. Standard open tip with four side hole.
2. Crown tip with four side holes.

STANDARD TIP

Reference No.	Type
Q0030 -A	Yankur suction set

CROWN TIP

Reference No.	Type
Q0030- B	Yankur suction set

CRITICAL CARE

QU-TUBI

VENTILATOR CIRCUIT

A ventilator circuit is a medical device that is used to deliver oxygen to a patient's lungs. The circuit consists of a series of tubes and connectors that are used to connect the patient to the ventilator. The circuit is designed to deliver oxygen-rich air to the patient's lungs and to remove carbon dioxide from the body. The circuit includes a breathing tube that is inserted into the patient's airway and a humidifier that helps to moisten the air. The circuit also includes a filter that helps to remove bacteria and other particles from the air. The ventilator circuit is typically used in hospitals or other medical settings, but can also be used at home with proper instructions from a healthcare provider. The circuit is designed to be comfortable for the patient to wear and easy for medical staff to use. It is also designed to be easy to clean and disinfect between uses.

Features :

- Delivers oxygen to patient's lungs
- Removes carbon dioxide from the body
- Includes a breathing tube, humidifier, and filter
- Designed to be comfortable for the patient to wear
- Easy for medical staff to use
- Easy to clean and disinfect between uses

Specifications :

Reference No.	Type
Q0034	Ventilator circuit expandable
Q0035	Ventilator circuit Std (ADULT)
Q0038	Ventilator circuit with port on Y-Piece

Reference No.	Type
Q0039	Ventilator circuit with SW Trap (ADULT)
Q0040	Ventilator circuit with DW Trap (ADULT)
